***Natural Forces Announces New family of Bio-Pesticides***

**Davidson, NC – March 25, 2010**

Natural Forces introduces three new additions to their bio-pesticide product line: Bugitol, Nemitol and Dazitol. All three are formulated as powerful insecticide/miticide/molluscicide/fungicide and repellent options for foliar, soil and soil mix applications. The concentrated products contain essential oil of mustard for fast knock down while the Capsaicin gives added residual control and repellency.

Use sites range from field crops, greenhouse, fruits and berries, ornamentals and turf grass. Bugitol, Nemitol and Dazitol are registered with the Washington State Department of Agriculture (WSDA) as Approved for Organic Farming and Gardening.

"Natural Forces is very pleased to offer this family of products to our customers. They offer a powerful two-pronged attack for insect and mite control and cover a multitude of uses." states Devlin Reynolds, President of Natural Forces. "We continue to build partnerships and develop products to provide new options for our customers."

To learn more, please call 866.532.4737 or visit [www.naturalforcesllc.com](http://www.naturalforcesllc.com).
